

AutoCAD Drafter/Designer – RiverRestoration

RiverRestoration is seeking applicants for an AutoCAD Drafter/Designer for its locations in Carbondale, Colorado, or Salt Lake City, Utah. At RiverRestoration, we base our designs on a river-centric perspective. Our work relates to a direct improvement in the social, economic, and environmental/ecological values of a healthy river. RiverRestoration employees take pride in this perspective, convey the benefits of this perspective to clients, and encourage others in the office to develop this perspective. The successful candidate will be involved in projects that include stream restoration, fish passage, aquatic and riparian habitat, bank stabilization, and recreational whitewater features.

The AutoCAD Drafter/Designer will support the production of river restoration engineering projects. This person will be a key member of the engineering team and will work alongside a tightly knit team of engineers and designers. This Role Offers:

- Competitive base salary plus potential performance bonuses.
- Wide range of engineering design projects.
- Strong company culture of collaboration and teamwork.
- High level of independence.
- Update, revise and scale designs as necessary according to client feedback.
- Opportunity to work with internal team members and clients to develop river engineering designs, drawings, plans, exhibits, and maps using AutoCAD Civil 3D under the guidance of the engineering team and project manager.
- Opportunity to develop specialized knowledge of water systems and river engineering.

To be considered, applicant shall demonstrate:

- 5+ years of progressive industry experience in drafting/design for the civil engineering or construction industry.
- Proficiency with engineering design software, including:
 - Drafting, designing and planset production in AutoCAD Civil 3D.
 - Using ArcMap GIS software to create maps/exhibits and perform spatial analysis.
 - Completion of certifications or training courses in AutoCAD Civil 3D.
- Strong communication skills.
- Proficiency with AutoCAD Civil 3D for creating construction plan sets, exhibits, and calculating quantities.
- Experience with ArcGIS software preferred.
- Experience performing construction observations and inspections would be a plus.
- Field experience with the use of survey equipment such as RTK GPS and Total Station would be a plus.

At RiverRestoration we have a strong culture and our staff is:

- Highly competent with strong backgrounds in science and applied real world experience.
- Highly productive with the ability to efficiently create valuable work products.
- Passionate about healthy rivers.
- Dedicated with a strong sense of loyalty to workmates.
- Confident, outgoing, and communicative.

To apply, please email a cover letter and resume to career@riverrestoration.org with “AutoCAD Drafter/Designer Applicant” in the subject line.
